

Job Description: Software Developer

Job Summary/Objective:

Responsible to develop, design, install, test and maintain the company's software systems. The programs you create are likely to help the company be more efficient and provide a better service to our customers

Responsibilities & duties:

- Development of software for use both internally and externally
- Take direction from the Director of Technology
- Work with internal stakeholders to gather requirements
- Keep up to date with developments in the industry
- Maintaining strong testing and documentation practices
- Inform the Director of Technology of any potential issues affecting the company

Skills/Attributes required:

- Knowledge and interest in computer systems and the latest technologies
- Strong understanding of programming languages such as Java, Ruby, PHP and Python
- Familiarity with front-end languages such as HTML, JavaScript, and CSS
- Excellent verbal and written English communication skills
- Proactive, highly motivated and flexible
- Highly organised and attention to detail
- Experience working with Western companies (preferred)

Qualifications/Experience required:

- Bachelor degree preferably Computer Science, Computer Software Engineering or Software Programming and Development
- 2+ years experience as a Software Developer
